I was a software development intern at AgRoss from May to October 2026, where I was responsible for moving the company's finance module to the new ERP and built the system that monitors the customer-service AI, using Oracle, PL/SQL, PHP and JavaScript. In October 2026 I launched Meu Bolso, an open-source Android personal-finance app built with React Native. Information Systems student at PUC-Campinas (2nd semester, evening classes). Available to start immediately.

Experience

AgRoss | Paulínia, SP **2026**
Software Development Intern

- Was responsible for migrating the company's finance module to the new ERP, with bank API automations that ran without human intervention.
- Contributed to the migration of the logistics system, one of the core points of the operation.
- Helped develop AgRoss Express, an AI that serves customers on WhatsApp in a personalized way.
- Created, from an idea of my own, the system that monitors the AI in real time through the Meta API: conversations, quotes, failures, costs, revenue and the margin passed on to the customer. The company adopted it.
- Took part in AgRoss CRM, a sales tool in which the salesperson submits quotes through WhatsApp.
- Developed web dashboards for sales and financial analysis.

ArcTest | Paulínia, SP **2025 – 2026**
Young Apprentice

- Reorganized 20 years of technical files: finding a document became instant.
- Created a new way to organize the calibration blocks, which increased lookup efficiency by about 200% and made audits easier.
- Formatted about 4 non-destructive testing reports per day, in Portuguese and English, following technical standards.
- Tracked 200 to 300 operator certifications, with traceability for audits.
- Gave direct support to the technical management.

Projects

Meu Bolso | otaviofelix-in.github.io/MeuBolso-Site **2026**
Android personal-finance app · React Native, Expo and SQLite

- Built it because no app showed the month the way I organize it: what comes in, what is already committed and what is left.
- Works offline, with no sign-up and no ads: credit cards with limits, installments spread over the coming months, reports, due-date reminders and fingerprint lock.
- Launched on Oct 19, 2026, with 4 updates driven by real use. Open source.

OffPilot | github.com/OtavioFelix-in/OffPilot **2026**
Plugin for Claude Code

- Systems built with Claude Code tend to all look the same. The plugin makes it ask what matters, propose a visual identity tied to the product's field and review its own work before delivering. Open source (MIT).

Prumo | otaviofelix-in.github.io/Prumo **2026**
Physics I (Mechanics) website with simulations · JavaScript, Three.js and KaTeX

- Nine Mechanics lessons with simulation, graph, step-by-step calculation and quiz, plus a 3D Lab. The physics is tested against OpenStax University Physics examples. Static site, no build.

Mentes do Software | otaviofelix-in.github.io/Mentes-do-Software **2026**
Digital magazine on software design · HTML, CSS and SVG

- An HTML magazine (in Portuguese) on ten schools of thought in software design: who thought each one, where they agree, where they disagree and where to study. SVG figures animated with CSS and an A4 print version. Static site, no build.

Studify | otaviofelix-in.github.io/Studify-Site **In progress**
Study planner for Android · React Native, Expo and SQLite

- Keeps exams, assignments and deadlines in one place, with reminders, calendar, Pomodoro, exam grades with average and a home-screen widget. Works offline.

EDUCATION / CREDENTIALS

- Pontifical Catholic University of Campinas (PUC-Campinas) — Campinas, SP
  Bachelor's Degree in Information Systems (Evening Program) – 2nd Semester

- High School – Completed

Completed Courses

- Python Fundamentals — SENAI (30h)
- Java Foundations — Oracle Academy (30h)
- AI-900: Azure AI Fundamentals — SENAI (40h)
- Power BI — SENAI (32h)
- Database Programming — SENAI (120h)

Other certifications: more than **20 completed courses** in technology, data, AI, Office suite, digital tools and professional development. **Full list available on my website or upon request.**

Languages

- Portuguese (Native)
- English – A2 level (**improving**)
- Spanish (Basic)

Hard Skills

- Languages: PL/SQL, SQL, PHP, JavaScript, Python and Java.
- Databases: Oracle, MySQL and SQLite.
- Web and Mobile: HTML, CSS, React Native, Expo and Laravel. Data: Power BI.
- Tools: Git, GitHub and Claude Code.
- Advanced Office Suite: Word, Excel and PowerPoint.
- Editing: Canva and CapCut.

Soft Skills

- Leadership
- Clear communication
- Organization
- Attention to detail
- Teamwork
- Responsibility
- Proactivity
